Our Mission

Grow our connected base by monitoring people, vehicles, and facilities simultaneously in precision as we expand our footprint in Asia.

What We Do

We provide advanced monitoring and management solutions across various domains, including vehicles, airports, vessels, and heavy machinery, to ensure optimal performance and safety. With our expertise, we help organisations enhance efficiency and meet regulatory compliance.

Our expertise is across these Industries

Aviation

Waste and
Sustainability

Warehouse

Construction

Manufacturing

Transportation

Our Solutions

Airport Management

Elevate airport operations with proactive management and real-time monitoring of vehicles and non-powered assets, ensuring efficient oversight. Our platform offers a holistic airside situational awareness, seamlessly integrating with existing airport platforms, GHAs, and other tracking data sources.

Waste Management

Empower waste management companies with real-time monitoring of heavy vehicles, predictive waste generation analysis, and optimized collection routes. Improve fuel efficiency, reduce maintenance costs, and enhance operational effectiveness with 24/7 live streaming for continuous vehicle monitoring. Identify high-demand areas for streamlined waste collection, ensuring safety through real-time hazard detection and environmental gas monitoring.

Smart Toilet

Efficiently manage restroom facilities with accurate real-time data traffic and usage insights. Optimize cleaning resources based on demand, reducing labor and costs through our connected restroom devices on a unified platform.

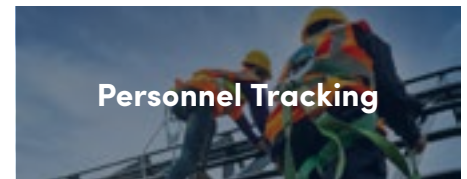

Equipment Monitoring

Enhance machinery and asset performance with predictive maintenance, leveraging cutting-edge sensors and advanced data systems. Minimize downtime and extend equipment life through continuous data analysis tailored to your equipment's vital metrics.

Fleet Management Solution

Gain real-time insights into your entire fleet, ensuring safe and efficient operations. Optimize fleet performance, eliminate wasteful overhead, and streamline operations with Overdrive's comprehensive fleet management solution.

Personnel Tracking

Prioritise worker safety in harsh industrial settings with precise monitoring of movement, whereabouts, and condition. Our robust platform offers an additional layer of security, implementing proactive safety measures and facilitating rapid response in emergency situations.

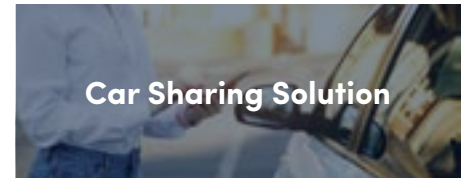

School Bus Monitoring Solution

Ensure the safety of school children by tracking their whereabouts with our innovative solution. Parents can stay updated on their child's location, school bus details, estimated time of arrival, and even the bus driver's identification, all through a convenient app.

Employee Transportation Solution

Effortlessly manage employee transportation services with our solution, offering administrators insights into transportation data logs and usage trends. Employees can focus on work, assured of a settled transportation home, while management optimizes efficiency and cost-effectiveness.

Car Sharing Solution

Tailored for your fleet, our car-sharing solution simplifies team and asset management. From vehicle booking to journey recording and maintenance alerts, our platform provides actionable insights for optimizing operations, enhancing profitability, and reducing operational costs.

Our Services

Full Cycle IOT Development

We transform your business vision into a reality. We formulate result-driven software innovations for businesses to optimize workflow, increase efficiency, and gain a higher relative advantage.

API Development & Integration Services

Cut down development time and costs. Experience seamless integration of business platforms and create dedicated APIs for web and mobile applications.

Software Product Development Services

We transform your business vision into a reality. We formulate result-driven software innovations for businesses to optimise workflow, increase efficiency, and gain a higher relative advantage.

Why Overdrive?

Scalable
Track different types of assets all in one single platform

Accurate
Monitor asset usage, time, location and activity in high level precision

Easy Integration
Fast, easy and hassle-free integration. We also allow third party platforms to integrate with us.

Detailed Analytics
We focus on the end user, transforming data into meaningful insights

Partners and Clients

At Overdrive, we recognize that our clients are our partners, and play a vital role in the creation of our world-class solutions. We value our close relationship with all of them therefore we stay committed in providing high quality service and in giving them with the best support they need to efficiently grow their business.
