

## OverWheels by Overdrive

Monitor your moving fleet

OverWheels offers fleet solutions that allow you to gain full control of your fleet in one powerful platform. Accurately track fleets of all types and have real-time visibility on fleet location, utilization, driver behavior, vehicle health, the temperature of onboard cargo and more. Set up virtual boundaries and immobilize your vehicles whenever you need to enhance safety and efficiency.

An ideal complement for companies operating in the transportation logistics, construction, and shipping industries as we provide the ability to assist in route optimization, heavy vehicle tracking, and delivery monitoring.

Sailing into the sea? OverWheels will navigate the sail with you as we enable marine companies to capture real-time data on vessel position, speed, and status, ensuring they never venture into unsafe waters.

### The Benefits

Optimise your fleet's operation with OverWheels.

#### Reduce Fuel and Operating Cost

Analyze driving behavior to eliminate wasted time and boost cost-efficiency

#### Improve Productivity

Plan routes to minimize cost and time spent on the road

#### Increase Safety

Identify dangerous driving behavior and provide key safety metrics for your drivers such as speeding and harsh braking

#### Optimise Vehicle Maintenance

Have full report of your vehicle activities and increase vehicle lifespan

#### Expand Your Business

Streamline your fleet-related business and give your team more time to grow your logistics operations efficiently

#### Free Installation

No upfront set up costs, just monthly subscription fee

## OverWheels Solutions

# 1. Fleet Management Solution

Gain full control of your moving fleet in one powerful platform. We provide you with a real-time overview of your entire fleet – including location data, speeding, idling engine faults, geofencing, and even the temperature of your onboard cargo, to ensure your fleet is running safely and efficiently.

## Key Features

### Fleet Overview

Gain full control over your fleet operation in a centralized platform

### Trip Monitoring

Track your vehicle's location from end to finish and get update intervals every 3 – 5 seconds.

### Live GPS Tracking

Capture real-time updates on your vehicle's location, status and, activities

### Real-Time Alerts

Get instant alerts and set triggers for speeding, idling, engine faults, battery level, and geofences.

### Live Reporting

Access your data anytime and anywhere

### Driver Management

Keep your driver safe by monitoring risky driving behavior such as harsh braking, cornering and, accelerating

Stay connected with your fleet with our Software-as-a-Service (SaaS) platform, giving you access and security to all your valuable data.

## Looking For More?
