Overdrive IoT Pte Ltd

Company Profile

About Overdrive

Overdrive is the leading real-time asset monitoring IOT company that connects vehicles, facilities, equipment, people and other assets into a mesh network and offer real-time accurate data on Overdrive platform.

Our platform is configured to optimally deliver business objectives such as real-time tracking and monitoring, exception alerting and command centre visualization.

Our technology is unique because of our open architecture that is able to ingest both in-house and partnered intelligence modules together and with an ability to tweak device-level firmware and connectivity — making our platform highly robust and scalable.

provides **end to end** solutions.

Our Mission

Grow our connected base by monitoring people, vehicles, and facilities simultaneously in precision as we expand our footprint in Asia.

What We Do

We Specialize in

Vehicle Monitoring

Airport Management

Vessel Tracking

Heavy Machinery Monitoring

People Monitoring

Smart Hygiene

Sustainability Solutions

Environmental Monitoring

and more.

Our expertise is across these Industries

Warehouse

Construction

Oil and Gas

Transportation

Shipping

Logistics

Our Products

OverLink For Global Connectivity

A seamless machine-to-machine connectivity service for IoT applications, offering you reliable global connectivity to keep your business on the right track. Easily connect devices anywhere in the world and manage your connected IoT devices and sensors at any scale.

OverWheels For Vehicles

Gain full control your fleet of vehicles. Find out where your vehicles are, their estimated time of arrival, how fast they are going, if they need to be serviced and even the temperature of on-board cargo. Beyond tracking, we improve efficiency and reduce cost.

OverGuard For Facilities and Equipment

Accurately track equipment, assess facility conditions and even monitor toilet consumables and usage patterns in real-time. OverGuard grants you the power to end-to-end visibility over your most valuable assets anywhere- even in locations where GPS is not available.

OverPax For People

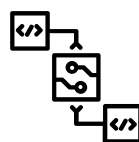

We provide end to end transportation solutions for moving people safely, effectively and efficiently. We equip workers, students, employees, and subcontractors with the ability to send and receive precise geolocation data and enable real-time movement tracking to ensure their safety, always.

Our Services

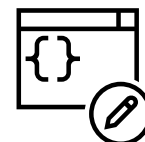

Full Cycle IOT Development

We cover all stages of IoT development. We help you formulate ideas, develop products, and provide support and maintenance for accurate data access and visualisation anywhere, anytime.

API Development & Integration Services

Cut down development time and costs. Experience seamless integration of business platforms and create dedicated APIs for web and mobile applications.

Software Product Development Services

We transform your business vision into a reality. We formulate result-driven software innovations for businesses to optimize workflow, increase efficiency, and gain a higher relative advantage.

Why Overdrive?

Scalable

Track different types of assets all in one single platform

Accurate

Monitor asset usage, time, location and activity in high level precision

Easy Integration

Fast, easy and hassle-free integration. We also allow third party platforms to integrate with us.

Partners and Clients

At Overdrive, we recognize that our clients are our partners, and play a vital role in the creation of our world-class solutions. We value our close relationship with all of them therefore we stay committed in providing high quality service and in giving them with the best support they need to efficiently grow their business.
