OverLink

A secure IoT connectivity, anywhere

OverLink is a machine-to-machine (M2M) sim card that enables device-level IoT connectivity and helps enterprises worldwide to jumpstart their digital transformation. We empower you with a low-cost open roaming SIM solution to better manage your connected IoT devices and sensors at any scale. Designed to provide secured worldwide coverage, OverLink's M2M network is tailored with geo-redundant and robust network architecture, which reduces signal failure and offers protection against fraudulent usage.

Benefits that OverLink bring

Unrivaled Coverage

Get the best coverage and signal in every corner of the world.

Less throttle, more speed

We support multiple networks so you can always have the fastest speed to prevent bandwidth throttling.

Web portal for easy SIM Management

Manage your devices with a single simple and user-friendly web platform.

Cost Saving

Manage your device consumption at a glance to avoid unnecessary data usage.

M2M SIM management in real time

Worldwide Connectivity

Avoid the hassle of managing multiple carriers and rely on one SIM for global coverage. Over hundreds of Global Roaming Operator Agreements in multiple countries worldwide and supports available.

- National Roaming
- Worldwide access to multiple countries
- Available network support: 2G (GSM/GPRS/EDGE), 3G (UMTS/HSDPA/HSPA+), 4G (LTE/LTE Advanced), LTE-M (LTE Cat M1) and NB-IoT

Service Availability

OverLink allows you to change between different providers, switching to the next strongest signal when a signal cannot be detected. Reach your IoT and M2M devices when needed and even in the most remote places.

- Full geo-redundancy
- 99% availability
- Free network selection

Extra Security Options

OverLink offers a wide range of M2M sim connectivity services for your IoT device for you to safely connect your IoT devices to a router and any platform. We offer IP address restrictions as added protection against fraudulent sim card usage.

- Private APN
- IPsec VPN
- VPN or Amazon AWS Transit Gateway (on request)
- Static private IPs from own private Subnet
- IMEI lock

OverLink Management Platform

Monitor and manage all IoT and M2M SIM Cards in a single connectivity hub platform. Get an overview of all SIM card traffic, usage, consumption and network operation.

- UI and APIs ready for instant integration
- Set up alerts and data threshold limits
- Activate, deactivate and pause SIM cards
- Send and receive SMS from device
- Easy M2M SIM inventory

Durable Design

OverLink fits in any device and is available in any forms designed to resist rugged conditions and built to last up to a decade.

- 2FF Mini SIM
- 3FF Micro SIM
- 4FF Nano SIM
- MFF2 Embedded SIM
- Industrial SIMs

OverLink Applications

We make it easy for you to connect devices anywhere in the world. Start your journey with OverLink and expand your coverage area and data capacity.

Cross-border Transit

Never lose sight of any asset and stay connected even when they travel overseas.

Equipment Monitoring

Monitor the location, status, and condition of heavy equipment, trailers, machines, and other non-powered assets from anywhere & on-the-go

Vehicle Fleet Tracking

Get a real-time overview of your entire fleet. Capture your vehicle's location, speed, engine status and even the temperature of your onboard cargo.

GSM-based Smart Sensors

Monitor remote devices such as temperature sensors, weather stations, tide gauges, water level and more. Get secured and accurate readings anywhere in the world.

Find the perfect plan for your IOT needs

Stay connected globally with OverLink

Who Are We

Overdrive is the leading real-time asset monitoring IOT company in Asia that provides end-to-end IoT solutions and automates data sensing of various types of assets within a business ecosystem, from vehicles and machinery to facilities and people – all under one roof.

What We Do

Specialises in

- Vehicles Monitoring
- Airport Management
- Vessel Tracking
- Heavy Machinery Monitoring
- People Monitoring
- Smart Hygiene
- Environmental Monitoring
- Sustainability Solution

Hello,
